FAST FASHION

Think Before You Buy!

Fast fashion is a system where clothes are made very quickly and sold at low prices. Brands produce many collections every year, so trends change very fast. As a result, **people buy more and more clothes than before.**

Why Do People Buy Fast Fashion?

\$

Cheap Prices

Fast fashion is affordable and accessible to everyone, making it tempting to buy more.

*

Trendy Styles

New clothes arrive very often, so it is easy to follow the latest fashion trends.

@

Social Media

Seeing influencers on social media, people want to buy new outfits all the time.

Polluting Our Planet

7,000 Litres

One pair of jeans needs about **7,000 litres of water** to produce -- that is what one person drinks in 5 years!

Massive Waste

Many clothes are **thrown away quickly**. Fast fashion uses a lot of water and creates enormous amounts of waste.

The Human Cost

Fast fashion is also affecting workers. Many people are working in **difficult conditions** and earning **very little money**. Some workers have worked long hours in **unsafe factories**.

HOURS

Long hours with no breaks

WAGES

Extremely low wages

DANGER

Unsafe working conditions

Make Better Choices!

1

Buy Less

Only purchase what you truly need and will wear often.

2

Second-Hand

Shop at thrift stores. Give clothes a second life!

3

Repair

Fix your clothes instead of throwing them away.

4

Donate

Give your old clothes to someone who needs them.

Your Choices Matter.

Every time you buy a piece of clothing, you are making a choice. Choose wisely. Choose sustainably. Choose to make a difference.
